

Asterix

Asterix 85 CRM delivers high starch silage.

Great for very quick silage or grain to fill that void these tough seasons can create, or for planting/harvesting outside of key operating windows in North Island regions. Asterix is also showing great results in Southern regions, where this fits into the growing window. Growers seeking high yield at this CRM with excellent standability and disease tolerance should be growing Asterix.

Planting population

90,000 to 110,000 seeds/ha (GRAIN 75-100K)

 <p>Plant type: 85CRM for early silage or quick grain.</p>	 <p>Yield potential: Excellent yield potential for a short CRM with a solid disease package.</p>
 <p>Plant height: Medium plant with a solid root structure.</p>	 <p>Grain type: Dent x Flint. Highly digestible feed grain. High grain content as silage and grain.</p>

Trait scores

General comments: Quick yields that fit a shorter growing season.
