

Goliath

The perfect HSR 110CRM hybrid.

Developed in Australia as a dual-purpose hybrid with a fit for both silage and grain, it has impressed in New Zealand hybrid assessments in both yield and its overall agronomic package. Goliath is a tall plant with large cobs and bold 'dent' kernels, making it an ideal option for a full-season silage crop.

Planting population

90,000 to 100,000 seeds/ha (GRAIN 75-100K)

 <p>Plant type: 110CRM silage or grain.</p>	 <p>Yield potential: Excellent yields and overall agronomic package.</p>
 <p>Plant height: Tall plant with high stress tolerance, good water use efficiency.</p>	 <p>Grain type: Dent x Dent. The medium-soft kernels provide readily available starch for effective digestion.</p>

Trait scores

General comments: Full season hybrid that delivers big results.
