

Goliath NEW

(110 CRM)

An exciting new HSR hybrid for Spring 2022.

Developed in Australia as a dual-purpose hybrid with a fit for both silage and grain, it has impressed in New Zealand hybrid assessments in both yield and its' overall agronomic package. A tall plant with large cobs and bold 'dent' kernels makes it an ideal option for a full-season silage crop.

It has a high stress tolerance, good water use efficiency (WUE) and produces good quality silage with excellent levels of grain.

The medium-soft kernels provide readily available starch for effective digestion. Growers seeking a full season hybrid that delivers big results should look to grow Goliath on their farm.

PLANTING POPULATIONS

90,000 TO 100,000 seeds/ha
(SILAGE 80-90K) (GRAIN 80-90K)

Plant Type:

110 CRM Silage or Grain

Yield Potential:

Excellent yields and overall agronomic package.

Plant Height:

Tall plant with high stress tolerance, good WUE.

Grain Type:

The medium-soft kernels provide readily available starch for effective digestion.

General Comments:

Full season hybrid that delivers big results.
